- Apollo Sunguard’s Sun Shades
 - Custom Designed
 - Large Sail Canopies
 - Heights reaching 9 to 28 feet in the air

“You can see these rounded curves when you are sitting underneath it, but as you approach the structure from the side – from the parking lot or from the pond – you have these saw-toothed, jagged, almost violent shapes that point up and down and then you have this tail coming to the back. But, when you look at it from the top or from the bottom, it just looks like a gentle single canopy – but it’s actually two.”
- Earnesto De Oliveira, Chief Operating Officer and VP of Engineering for Apollo Sunguard.
